

UNITA Universitas Montium

Final meeting

SOCIAL, ECONOMIC AND LEGAL CHALLENGES IN WATER GOVERNANCE FOR A CLIMATE-RESILIENT AND SUSTAINABLE FUTURE

September 4, 2026, 09:30-16:30

University of Turin, Turin, Italy

HYBRID event, online and room H6,
Campus Luigi Einaudi Lungo Dora Siena, 100, 10153 Torino

Coordinator: Prof. Stefano Maria, Ronco
Scientific committee: Dr. Marco Colella, Dr. Marta Domini

Founders:

UNITA universitas montium

Co-funded by the European Union

Project leader:

UNIVERSITÀ DEGLI STUDI DI BRESCIA

Project partners:

Hes·so Haute Ecole Spécialisée de Suisse occidentale

UNIVERSIDADE BEIRA INTERIOR

West University of Timişoara

UNIVERSITÀ DI TORINO

Changes in precipitation, droughts, and the depletion of water resources are intensifying water scarcity and compromising water security in Europe and across the world.
Addressing these issues requires alternative approaches and a multidimensional systemic perspective. The UNITA Starting Grant project “Social, economic, and legal challenges in water governance for a climate-resilient and sustainable future” was aimed at creating an interdisciplinary international group finding common ground in addressing current challenges and in proposing novel approaches for equitable water management under climate change. The final meeting will summarize main findings and open the discussion on future steps. The participation will be hybrid.
